

RYAN MAHESA

COMPUTER SCIENCE - SOFTWARE ENGINEERING STUDENT

Bekasi, Indonesia | +6281311481712 | ryan.mahesa@binus.ac.id | mahesaryan350@gmail.com

SUMMARY

A 5th-semester Software Engineering student with strong interest in AI and product development. Recently led a team as Product Manager in Garuda Hacks 6.0 to build NABUNG.AI, an AI-powered platform for SMEs. Passionate about combining intelligent systems and user-centric design.

LEADERSHIP EXPERIENCE

AIESEC Future Leaders – Leadership Development Program

May 2024 – July 2024

- Gained hands-on experience in leadership, problem-solving, and project management.
- Worked in a dynamic team to develop and execute community-driven initiatives.
- Enhanced communication and teamwork through workshops, mentorship, and real-world challenges.

President – Binus Bekasi Volleyball Club

Feb 2025 – Present

- Lead and manage club activities, ensuring smooth operation and team development.
- Organize training schedules, competitions, and community engagement events.
- Coordinate with university administration and other regional volleyball teams for tournaments.
- Enhance team performance through structured training and mentorship programs.

VOLUNTEER EXPERIENCE

Public Relations – BizChildhood Event

Dec 2023 – Feb 2024

- Managed event communication strategies, ensuring effective promotion and audience engagement.
- Coordinated with stakeholders and sponsors to support event success.
- Enhanced public relations efforts, leading to a 20% increase in event participation.

Volunteer Teacher – AIESEC SDG Program

July 2024

- Educated elementary school students on Sustainable Development Goals (SDG).
- Developed engaging lesson plans and activities to enhance student understanding.
- Worked closely with a diverse team to ensure effective knowledge delivery and interactive learning experiences.

PROJECTS

Picverse Community Website – Web & UI/UX Designer

Feb 2025

- Designed and developed a responsive community website for digital art enthusiasts.

NABUNG.AI – Product Manager (AI-powered SME Platform)

July 2025

- Led the development of NABUNG.AI, an AI-powered SME platform, as Product Manager. Defined features, coordinated the team, and delivered the MVP in 30 hours—earning 3rd Place in the Sustainability Track at Garuda Hacks 6.0.

ACHIEVEMENTS

3rd Place Winner – Sustainability Track, Garuda Hacks 6.0

July 2025

- Acted as Product Manager in a cross-functional team of 4.
- Led the development and planning of NABUNG.AI, a business intelligence platform for SMEs.
- Integrated AI-powered chat interaction (using third-party models), real-time analytics, and forecasting features.
- Ensured smooth collaboration between frontend/backend, design, and AI integration.
- Coordinated the final pitch and product presentation that led to a top-3 placement.
